GYPSUM BOARD ACCESSORIES

DESCRIPTION

-Gypsum board accessories; are complementary products used in the construction of gypsum board wall lining and suspended ceiling systems. Like all other components of gypsum board systems, these products are designed to be easily assembled and disassembled, forming a flexible structure.

AREA OF APPLICATION

- Gypsum board accessories; are used in the construction of gypsum board, suspended ceilings and wall lining.

FEATURES

- Gypsum board accessories; are coated with zinc using the hot-dip galvanizing method for protection against corrosion.
-The zinc coating does not flake off when folded.
-Manufactured from thin steel sheet by the cold forming method.

APPLICATION

-Hanger Rod; used to hang gypsum board suspended ceiling systems from the ceiling. The hanger rod is passed through steel anchors and carries the clamps.

-Clamp; used to form the metal load-bearing frame in interior gypsum board ceiling applications. In suspended ceiling and gypsum board applications, the product is attached to the hanger rod and carries the main C profiles.

-Clip; used in interior gypsum board ceiling applications; after being inserted into the secondary profiles, it is folded over the main profiles, thereby connecting the profiles to each other.

-Connector; installed at the joints of profiles and connects the ceiling C profiles to each other.

-Bracket; installed by fixing to the existing slab during suspended ceiling construction. Used instead of a hanger rod and clamp where the distance between the existing slab and the suspended ceiling is small.
